Trends & Applications

**Asian Pacific Edition**

**DENTAL TRIBUNE**

**functional loading. Factors such as intensity and duration must be constant, as the system can be divided into three types: direct trauma (the result of a sudden and direct blow to the involved tissues), indirect trauma (the result of the stresses placed on the system), and micro-trauma. The former is characterized by single blows, such as a direct blow to the mouth, while the latter is characterized by repetitive stresses.**

**HIGHEST QUALITY SURGICAL INSTRUMENTS**

**Medesy**

Medesy is the result of knowledge, skill, and craftsmanship, an extension of the Mannigo smith’s art, from the Renaissance to today and tomorrow, a symbol of a culture of ingenuity and industrious refinement, dedicated to their profession as if it were their own.
