ultra mini head & super slim body

new S-Max pico

S-Max pico Series features ultra-mini head and super-slim body that has been developed specifically for delicate operations with high precision. With its greater visibility and accessibility to hard-to-treat oral areas, pico allows you to work more freely on pedodontics treatment, chamber opening, minor-technique operation, and buccal and lingual axial reduction in the posterior areas. Pico is now a "must-have" handpiece for every practice and clinic which will be beneficial to both patients and clinicians. Use of NSK's original pico bur (or its equivalent bur) is strictly required.

The smallest head size in the world

The smallest head in dentistry allows for the biggest treatment area

Dedicated burs for S-Max pico series

Specifications of each bur:
- P01 for cavity preparation and removing the soft tissues
- P02 for preparation of small proximal cavities
- P03 for preparation of small buccal or lingual
- P04 for the use of slow-speed handpiece and high-speed preparation
- P05 for the preparation of facial and lingual cavity
- P06 for finish of the marginal preparation

The slimmest neck in the world
Belmont leads the way with a totally new generation of dental treatment centre.

Belmont has combined cutting edge technology with traditional values for a dental treatment centre that offers sophistication, performance, flexibility and above all durability.

The Clesta II epitomizes Belmont’s reputation for innovation, style, practicality and reliability. Technologically advanced and superbly engineered it represents a new generation of dental systems.
