Contemporary Endodontics and Complex Restorative Treatment Planning Course

Date: May 4-5, 2012
Venue: Dhs. 1500.00
10 DHA C.M.E.

Dr. Samira Al-Salehi
BDS, MFDS (UK), FDS (Rest. Dent) RCPS, PhD (Sheffield), FHEA (UK)

Dr. Samira Al-Salehi is Director of the Endodontic and AECD programs at European University College (ELC), Dubai. She is also a Consultant in Restorative Dentistry (Dubai Health Authority) since 1 May 2011. Endodontics at EUC is a three year higher specialty training program. The AECD program provides advanced general dentistry training to improve the skill base of dentists who wish to work in primary care and/or specialize in one of the three year specialty programs offered at NAU.

Dr. Samira graduated from Manchester University, UK and practiced general dentistry for a number of years before becoming a Lecturer/Specialist Registrar in Restorative Dentistry at Sheffield University. In January 2007, Dr. Samira was awarded GCST (UK) in Restorative Dentistry. She is on the UK specialist lists in Prosthodontics, Endodontics, Periodontics and Restorative Dentistry. Dr. Samira is a member of the British Endodontic Society, British Society of Restorative Dentistry and a Fellow of the Royal College of Physicians & Surgeons of Glasgow.

Dr. Samira is an expert in the field of Dental Bleaching and was awarded the degree of PhD from Sheffield University in September 2007. She has a number of publications in top ranked refereed journals. She also has a vast teaching experience gained from working at three leading UK dental schools; Sheffield, The London and Manchester. In recognition of her teaching experience she was awarded FHEA (Fellow of the Higher Education Academy, UK) in 2008. From September 2008 until 30 April 2011 Dr. Samira worked as Associate Professor and Consultant in Restorative Dentistry at Manchester University Dental School.

This course is designed for general dentist and those who wish to specialize in Endodontics as there is a focus on treatment planning of complex restorative cases and in depth coverage of many aspects of Endodontics.

The two day course covers the importance of accurate endodontic diagnosis and treatment planning of endodontic and complex restorative cases. A hands-on NiTi rotary session will be delivered as part of Day 1 as well as a complex Restorative treatment planning workshop on day 2.

- Systematic methods of case assessment
- Flare canals with NiTi rotaries
- Application of strategies to minimize the risks of rotary file separation
- Description and application of the principles of apical patency
- Application of the principles of predictable ISO and tapered fit
- Understanding the importance of careful treatment planning in complex restorative cases
- Understanding the importance of controlling occlusion in full mouth rehabilitation cases
