What Happens In Dubai Does Not Have To Stay In Dubai

The American Academy of Implant Dentistry Proudly Presents the 2nd Global Conference in Dubai

By Shankar Iyer

The first Global conference of the AAID was held in New Delhi in 2010 along with the World Congress of Oral Implantology and this time the second Global conference is being held with the 5th Annual Dental Facial Conference. The theme of the Conference is “Preventive Issues in Implant Dentistry”. World renowned experts will present the state of the art concepts to explore the controversies surrounding dental implant therapy. What type of soft tissue augmentation works? Which is the best method to grow bone vertically? Is “All on Four” better than traditional hybrid prostheses? Protocols to manage periimplantitis and several other issues will be presented at this conference.

I am delighted to work with Dr. Nisar Banday who is the Secretary for the congress and has made some significant strides in educating AAID Members in the UAE. We are bringing world class speakers like Drs. Michael Sonick, Hilt Tatum, Natalie Wang, Mark Lin to name a few. In addition to the main congress expert clinicians will present table clinics to share their tips and techniques with their peers. Resident graduates and Academia will proudly be displaying their research through poster presentations.

A hallmark of this congress will be post-conference hands on Advanced Bone grafting course which will feature a separate hard tissue and soft tissue augmentation programs. This is a limited participation program that will be a pre-requisite course for the live patient training program later in the year.

I am pleased to invite you to this conference to witness some of the finest in the field and be immersed with the fusion of esthetics and implant dentistry. You are sure to benefit from exceptionally knowledgeable and trained instructors. You will find an atmosphere of camaraderie, warmth and friendliness that will make you feel at home.

Highly experienced speakers from around the world have come together to make this event a must-have for all dental professionals to be part of.
