Dental Wings integrates Neodent implants into guided surgery software

By Dental Tribune International

CURIIBA, Brazil/ MONTEAL, Canada: Dental Wings, international provider of CAD/CAM and guided surgery solutions for dental laboratories and clinics, has announced that it has integrated products from Brazilian implant manufacturer Neodent into its coDiagnostiX software. Through the collaboration, users of the guided surgery software will gain access to Neodent’s implant and sleeve system, consisting of two implant series, three sleeves and one fixation pin.

Frank Stockmann, vice president of guided surgery at Dental Wings, said that his company is proud of guided surgery at Dental Wings, said that his company is pleased to be able to give its customers access to products from one of the most rapidly expanding implant companies in the world through its coDiagnostiX software. “We are confident that Neodent customers will enjoy the benefits of a sophisticated and user-friendly guided surgery solution,” he added.

Neodent was founded in 1993 and was the first Brazilian company in the implant segment to receive certification from the Brazilian ministry of health. Headquartered in Curitiba in Brazil, the company runs subsidiaries in the U.S., Mexico, Portugal and Spain. Today, Neodent employs more than 900 people, operates more than ten branches in Brazil and works with a wide network of distributors.

In addition to coDiagnostiX, which was acquired from Straumann in 2013, Dental Wings offers an open CAD/CAM platform called DWOS, both of which are aimed at improving the quality of restorations and dental treatment, and increasing the productivity of laboratories and clinicians. The company announced that coDiagnostiX will be fully integrated with the DWOS platform by fall 2014.

New treatment center from Sirona: Quality “made in Germany” at an attractive price

By Sirona

With the introduction of the new treatment center INTEGO and the INTEGO pro, Sirona presents the next product generation for the treatment center division. INTEGO combines technology and design in one package. "We are entering a new product generation for the treatment center market, that offers practitioners high-quality and proven solutions at an attractive price. As with all other Sirona centers, the INTEGO is also produced in Bensheim, Germany, where it is put through its paces. The long-lasting design, use of high-quality, robust materials, product quality "made in Germany" and a focus on ergonomics operating procedures and patient comfort make this a treatment center which is not only future-proof, but also facilitates the everyday working lives of dentists and assistants. INTEGO is available now from dental dealers. More detailed information on the functions and specifications of this treatment center can be found at the official Sirona company website. The price of the INTEGO will vary between 15,000 and 25,000 Euro, depending on individual configuration."

The new treatment center comes in two versions: INTEGO and INTEGO pro with extended functionality. Each model can be supplied as a hanging hose model (TS) or with whip arms (CS) in a wide range of shades. Both versions are based on a chair concept which takes the four dimensions of ergonomics into account – intuitive sitting, comfortable positioning, optimum visibility and integrated workflows – and thus ensures that practitioners achieve ideal results. The individual functions, the instruments and all the settings can be simply selected and controlled via a intuitive user interface. In comparison, INTEGO pro offers enhanced functionality. Some features, e.g., the 4-way foot switch and the automatic disinfection device, are even included in the basic INTEGO pro model. Furthermore, INTEGO pro offers more optional functions: For example, the customer can choose features such as the ApexLoc.ator.

INTEGO is the perfect complement to the product family INTEGO is an ideal addition to Sirona’s treatment center product family and fills the gap between CS+ and SINIUS. With INTEGO TS and CS versions, the dentist element can be positioned above the patient. In contrast, TENEO and SINIUS feature a sliding track which positions the dentist element either automatically or manually. As high-end products, SINIUS and TENEO also offer motorized functions, for example an adjustable headrest, a massage function to ensure patient comfort as well as the option of hand-free operation of the center. As such, Sirona satisfies a wide range of the most diverse requirements made by dentists and patients alike. The treatment centers represent high-quality and proven solutions at an attractive price. As with all other Sirona centers, the INTEGO is also produced in Bensheim, Germany, where it is put through its paces. The long-lasting design, use of high-quality, robust materials, product quality "made in Germany" and a focus on ergonomics operating procedures and patient comfort make this a treatment center which is not only future-proof, but also facilitates the everyday working lives of dentists and assistants. INTEGO is available now from dental dealers. More detailed information on the functions and specifications of this treatment center can be found at the official Sirona company website. The price of the INTEGO will vary between 15,000 and 25,000 Euro, depending on individual configuration.
